

Quest

from Intel® AI for Youth

«Discover the World of AI»

Welcome to the «Discover the World of AI» Quest from Intel® AI for Youth!

IMPORTANT INFORMATION!

To complete the programming task, please install the software from the list below in advance so as not to waste time during the quest.

Software list:

Python 3.6+ (Python is installed by default on many operating systems, but at the moment it is usually not the most recent version of Python 3).

- **For Windows**
Please follow the [link](#) and download the installer of the most recent Python 3 version for Windows.
- **For MacOS**
Please follow the [link](#) and download the installer of the most recent Python 3 version for MacOS

Anaconda Navigator

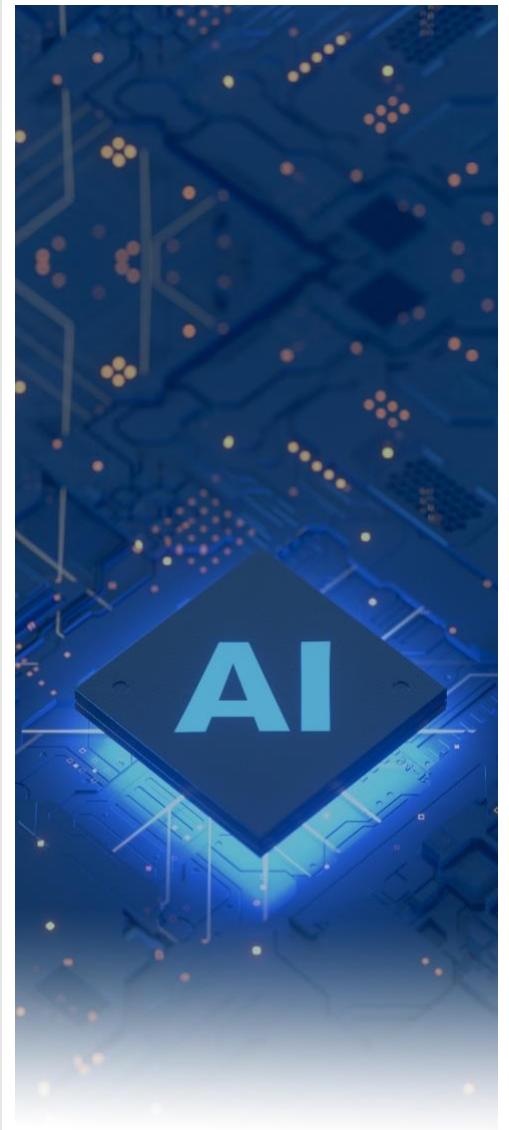

- Please follow the [link](#) and download the installed of the most recent available version.

Jupyter Notebook (available in Anaconda Navigator)

- A notebook with SW development task for a better visualization is prepared by organizers in Jupyter Notebook

Nltk library.

- The task will be based on working with nltk library resources.
- You can get familiar with documentation beforehand by following this [link](#).

Thank you and see you on December, 5 at AI Junior!
